# 1WHEEL REVOLUTION

**What We Do:** 1WheelRevolution(1WR) combines advanced v-twin riding and professional presentation into a mobile entertainment thrill show! 1WR has traveled across the USA since 2009 performing over 200 different events in 30 states! These events include performances for Harley-Davidson Motor Company, Harley-Davidson dealerships, v-twin motorcycle rallies, and team sponsor promotions. Outside of those events, the team completes photo and video shoots for leading motorcycle industry brands. 1WheelRevolution's professional presentation, rider narrated performances, and use of strictly v-twin motorcycles allows them to captivate and entertain any audience! Whether it is a massive venue in front of thousands or a dealership event with limited space... 1WheelRevolution delivers!

**Our Machines:** All 1 Wheel Revolution performances are completed on Harley-Davidson v-twin motorcycles. The bikes currently in use are: 2016 XL1200CX Roadster, 2018 FXFB, 2018 FXLRS and a 2004 Street Glide. A 2019 Electra Glide Standard and a 2021 Pan America will be the newest addition to the 1WR v-twin stunt fleet. A fully wrapped 2017 Mercedes Sprinter provides reliable and efficient transportation of all riders, (3) v-twin bikes, the 5000 watt sound/power system and show equipment! Presentation and first impressions are priceless, therefore all team bikes and equipment are kept in top shape for every event.

**Our Performances:** 1WR's thrilling performances utilize an incredible 5000 watt sound system that allows the riders to communicate with the audience during the performances! This direct communication paired with extremely technical riding creates a thrilling experience for audiences of all ages. 1WR performances combine the most technical riding, acrobatics, drifting, and burnout maneuvers to deliver a thrilling experience far beyond that of the average v-twin stunt show. With thousands of hours of practice, 1WR team riders are capable of pushing the v-twins to their limits over large show arenas or cautiously maneuvering them in even the smallest entertainment areas. Each performance relies on choreography and careful rider analysis of the riding area to deliver the best performance available. 1 Wheel Revolution's flawless safety record is a testament to the "spectator first" approach the team takes at every event!

**Brand Exposure:** 1 Wheel Revolution works diligently to create a flawless presentation of the brands behind their operation. 1 Wheel Revolution frequently participates in media coverage, interviews, and photos shoots for various articles/promotions/ads(HotBike, ThunderRoads, IronHorse, ICON Limiter, EasyRiders and more). The 1 Wheel Revolution team works with their sponsors and sponsored events to create the highest return for everyone involved. Sponsor support helps 1 Wheel Revolution upgrade their presentation, feature new v-twin machines, and gain access to large scale events for further brand exposure.

**Our Mission:** Creating the most extreme and professional v-twin entertainment available!
